**Photographs:**

After a thorough review of all of the submitted photographs, we were unable to capture any anomalous activity on film.

**EMF**

Both EMF detectors were used at this location both during the consultation and the investigation. Normal baseline readings were present with no fluctuations during the investigation.

**Thermal:**

Not used at this location.

**Investigator Feeling / Experiences:**

**(Note: Personal experiences cannot in itself determine paranormal activity in a location, unless documented by video or audio equipment)**

**Chris F.** – No experiences to report. (Control)

**Wayne M.** – No experiences to report. (Control)

**Kevin J.** – Cold spots noted while in basement of barn; a camera was “ripped/thrown” from my hand and flew approximately 5 feet from where I was standing. This activity was noted and observed by the other investigator present (Jo). The device was fully charged prior to this but upon examination when I picked it up it the batteries were completely drained.

**Chris C.** – No experiences to report.

**Jo G.** – General uneasy feelings felt in the kitchen area; heard footsteps in the kitchen during “quiet time”. Cold spots and feelings of being watched while in basement of barn.

**Jo G. (Cont.)**

Heard sounds of movement from upstairs of barn and witnessed a ball of light on the ceiling.

**Russ G.** – Cold spots felt in different areas of the barn.

**Sensitive Report**

Our team sensitive was on hand per the clients request to help the client understand the activity being reported, as well as to try to pick up on the activity that the homeowner had claimed. During the walkthrough of the premises they were able to pick up on feelings that may corroborate the activity that the homeowner has experienced. After the initial walkthrough of the home and the outlying buildings the sensitive sat down with the client to describe what she had felt and sensed in the home. After the investigation was completed she gave the client advice on how to remedy the situation, as well as performed a clearing of the home.

**Final:**

After a thorough review of all the submitted evidence by the MPI team we were unable during our visit to capture any of the supposed activity on our recording devices. However our team sensitive was able to pick up on several of the homeowner's experiences and was able to counsel the homeowner and try to alleviate some of her apprehension about her home. We have spoken to the homeowner since our visit and she has told us that there has been no activity since our visit. We will be returning to this location to sit down with the homeowner on 7/0707 to go over our findings as well as to see if a follow up investigation is warranted.
