METRO PARANORMAL INVESTIGATIONS

Locker Room Saloon Investigation #5
Final Report
Submitted by: Chris Forsythe

Location:

Business, Utica MI

Date:

September 16, 2007

Source:

David (Owner / General Manager)

Investigation Duration:

19:00 – 01:00 (5 Hrs.)

Investigators Present:

Chris F. (*Lead investigator*)

Wendy F.

Kevin J.

Christy J.

Chris C.

Erin C.

Tack

David

Guests:

Micah

Location Condition:

Historic building with basement and upper level; formerly the site of a hotel and several other businesses prior to the area being destroyed by a fire. (See historical documentation)

Location Weather:

Mild temperatures all day, with a light breeze out of the southeast; as to be expected, temperatures dropped after nightfall.

Moon Phase: Waxing Crescent

Solar X-Rays: Normal

Geomagnetic Field: Quiet

Temperature: 64 F

Visibility: 10.0 miles

Pressure: 30.27 Falling

Dew Point: 34 F

Humidity: 32%

UV Index: 2 Low

Wind: SSW 9 MPH

Reported Activity:

- Shadow sightings
- Apparitions
- Uneasy feelings; feeling of being watched
- Disappearing object phenomena
- Levitations
- Footsteps
- Objects moving freely

Assignments & Operations Schedule:

Rally Point / Op Center:

Main floor - dining room area.

Team Roster:

Alpha - Chris F., Oz, Micah, Chris C. (*CCTV monitoring*)

Bravo – Kristie, Erin, Tack (investigation)

Charlie – Kevin, Wendy (investigation)

Investigation Schedule:

Basement / Office

8: 00 PM – Bravo team

9: 30 PM – Charlie team

11:00 PM – Alpha team

Upper Floor

8:00 – Alpha team

9:30 – Bravo team

11:00 – Charlie team

Main Floor

8:00 – Charlie team

9:30 – Alpha team

11:00 – Bravo team

Equipment on Hand:

Laptops (2)

EMF Detectors (2)

Laser Contact Thermal Gauge (LCTG) (1)

DVR Night Vision Cameras (3)

Mini DV IR Camera (1)

Digital Cameras

External Microphones

Digital Recorders

Micro Cassette Recorders

Flashlights

IR Illuminators

Note:

All recording equipment was loaded with both fresh batteries and recording media as is MPI investigation protocol, and voice checks were performed for recognition and recording quality. All media was transferred to digital file for review upon completion of the investigation.

Technical Notes / Equipment Placement:

- 2 DVR cameras located in main basement room (cross shot angles)
- 1 DVR camera upstairs main room towards long hallway
- 1 Mini DV w/ Night Shot IR - mobile, alpha team
- 1 Digital recorder – Stationary, upstairs main room

All teams will be outfitted with at least 1 mobile recording unit as well as several digital cameras. Stationary unit positions will be noted by the technical staff for reload and pickup at investigation completion.

Evidence Review and Findings

Photographs:

As is MPI protocol, every team had at least one digital camera with them at all times during the investigation. Upon further review, no photos taken during the investigation contained any anomalous activity.

EVP:

Digital #1 (stationary – upper floor, main room) – No physical evidence captured on this device at the time of the investigation.

Digital – (All mobile units) No physical evidence captured on any mobile device at the time of the investigation.

Micro Cassette – (Mobile unit) No physical evidence captured on this device at the time of the investigation.

Video:

Mini DV (mobile) – Approximately 4 hours of footage was taken on this device; however, no anomalous activity was captured during the investigation duration.

DVR Camera #1 (upper floor, main room) – No physical evidence captured on this device at the time of the investigation.

DVR Camera #2 (basement main room / south) – No physical evidence captured on this device at the time of the investigation.

DVR Camera #3 (basement main room / north) – No physical evidence captured on this device at the time of the investigation.

EMF:

Standard baseline readings were taken at the beginning of the investigation. Erratic readings were noted due to presence of large amounts of old wiring as well as heavy concentrations of audio / visual devices and cables wired throughout the entire location. We have concluded that an EMF device in this location can provide too many “false positives” to be used in this location.

Thermal:

Standard “baseline” readings were taken at the beginning of the investigation with an average of 74 degrees noted throughout the location. No other distinct temperature changes were noted by the investigative team at any point during the investigation.

Investigator Feeling / Experiences:

Note: Personal experiences cannot in itself determine paranormal activity in a location, unless documented by video or audio equipment.

Chris C. – No experiences to report.

Tack – No experiences to report.

David – Saw something distort one of the cameras in the basement. Heard odd noises that sounded like they were coming from another room. Saw a light source from the floor above me get blacked out like something passed by it four or five times.

Erin C. – When standing in the hallway in the upstairs area with Kristie, we heard a metallic creaking noise that could not be identified.

Kevin J. – While in the upstairs main room I heard what sounded like a light bulb pop. Upon inspection I found the light in the adjoining room intact.

Kristie J. – Sensed that something wanted to show itself all night; heard a metallic sound in the upstairs area that could not be explained or duplicated.

Wendy F. – Heard a strange noise from the basement while on the first floor; while sitting in the front room of the upstairs area I heard a rustling of plastic that sounded like it was coming from the upstairs storage area. Heard a sound like a light bulb pop and glass breaking in the upstairs front room and upon inspection the light bulb was intact.

Micah – In the basement at the beginning of the shift we heard a rustling noise. While watching the DVR cameras in the office area we saw something moving from the top left to the bottom right of the camera view in the other room of the basement. Saw something block the light sources that were coming from the ceiling.

Chris F. – While in the basement office area I heard what sounded like a rustling noise in the main room of the basement. While in the main room of the basement I was watching a light source on the ceiling and noticed several times that it was being blocked out like something passing by it.

Sensitive Report:

At the time of the investigation no MPI staff sensitives were available to collect any data for this report. Please refer to previous investigation reports for information regarding there findings.

Conclusion:

Once again we had the opportunity to investigate this location and try to document the activity that takes place there. During the investigation, several of the investigative team did have personal experiences that always seem to correlate with those that the staff and investigators have experienced in the past. Unfortunately during this investigation we were unable to capture any evidence as we have in the past but we will be returning at a future date to try and gather more data. This report will be presented to the client on 10/10/07 for review; no supplemental data has been received to date.
