## **Evidence Review and Findings**

### **Photographs:**

Several hundred photographs were taken during the duration of the investigation; upon review no submitted photos contained any anomalous activity.

**EVP:**

**Digital #1** – No evidence captured on this device during the length of the investigation.

**Digital #2** – No evidence captured on this device during the length of the investigation.

**Mobile Units** – No evidence captured on any mobile device during the length of the investigation.

**Video:**

**DVR Camera #1** – No physical evidence captured on this device at the time of the investigation.

**DVR Camera #2** – No physical evidence captured on this device at the time of the investigation.

**DVR Camera #3** – No physical evidence captured on this device at the time of the investigation.

**DVR Camera #4** – No physical evidence captured on this device at the time of the investigation.

**DVR Camera #5** – No physical evidence captured on this device at the time of the investigation.

**DVR Camera #6** – No physical evidence captured on this device at the time of the investigation.

**EMF:**

No EMF readings were taken during the course of this investigation, due to the age and condition of the location's wiring, as well as the presence of additional equipment; conditions present are conducive to the creation of false positive readings. As a result, EMF readings would be considered suspect at best and not usable as viable evidence.

**Thermal:**

An ambient device was on hand during the investigation and both baseline and internal area temperatures were noted. No unusual temperature fluctuations were noted from baseline averages: (Note: perimeter wall temperature did change from baseline due to rapid drop in temperature outside.)

Basement: 64.3 F

Main Floor: 71.7 F

Upstairs: 75.1 F

**Investigator Feeling / Experiences:**

**Note: Personal experiences cannot in itself determine paranormal activity in a location, unless documented by video or audio equipment.**

**Wayne M.** – No personal experiences to report.

**Chris F.** – During the entire duration of the investigation the atmosphere of the location was different than normal. Had feelings of being watched; noticed cold spots while in the basement area.

**Kevin J.** - No personal experiences to report.

**Kristie J.** - No personal experiences to report.

**Tack** – No personal experiences entered at the time of this report.

**Oz** – Thought I heard singing while in the office area; feelings of being watched; cold spots noticed.

**Tim F.** - No personal experiences entered at the time of this report.

**Erin C.** - No personal experiences to report.

**Chris C.** - No personal experiences to report.

**James** - No personal experiences to report.

**Stina** – Upstairs I felt someone touching me on my left side and it looked like something was crawling on the floor. Felt a cold spot on my left side. Downstairs in the office I was fine; then Tack and I went further into the back office. Tack asked anything present to lower the room's temperature, and the temperature did drop. We then walked back by the coolers and all of a sudden I felt really sad and started to cry. We returned to the office area and I was fine.

**Xochil** – Sitting in the practice room upstairs, I kept seeing movement on the floor. I felt like something was sitting next to me while in the same area. Felt cold spots on my left side. Saw a little girl in the basement with dark hair and a long dress running around in circles. In the back section of the basement main room I felt like someone was standing behind me. Had strange feelings while in that area.

**Conclusion:**

Once again, MPI had the opportunity to return to this location and attempt to collect evidence of paranormal activity. While on previous visits we have been fortunate to gather some compelling evidence of activity at this site, on this occasion we were not able to capture any activity on any of our recording equipment. While several individuals present did have personal experiences of an unexplained nature, we cannot use these incidents as proof of paranormal activity without further corroborating data. We will be returning for a final consultation with the client in the near future to present our findings for this investigation, as well as provide the client with a copy of this report. It is also our hope to be able to continue investigating the location, as part of an ongoing investigation.
